

Environmental Policy Statement

2020 Knowsley works with clients to deliver projects and provide better everyday services to people and communities.

Our services deliver many environmental benefits and improvements; however, we recognise that there is also a cost to the environment in the delivery of our services.

It is our policy to conduct our business in an environmentally accountable manner and we are committed to complying with all relevant environmental legislation and other requirements, and where practicable, to minimising any adverse environmental impacts that may result from our operations.

In implementing this policy, we aim to:

- Take into account the direct environmental impacts of our operations, including those of our offices, staff travel, and the procurement of materials and services;
- Work with our clients and the supply chain to identify and mitigate the environmental impacts associated with the projects and services we deliver;
- Prevent pollution from our delivery of services and projects;
- Monitor, measure and communicate (both internally and externally) the environmental performance of our activities in order to drive continual improvement in areas of significant risk and opportunity;
- Provide a culture of environmental awareness for our staff through training and communication.

As part of our commitment we have set objectives and targets, which will be reviewed annually as an integral part of our business planning and strategy development.

We believe that through the implementation of this policy and our management systems we are able to meet our commitment, and in addition look beyond simple compliance towards best practice.

A handwritten signature in black ink, appearing to read 'John Pincock', with a long horizontal flourish extending to the right.
